

Principles for Responsible Banking

Reporting and Self-Assessment Template

The following table sets out the reporting and self-assessment requirements for Signatories of the Principles for Responsible Banking. Signatory banks need to report on their implementation of the Principles the first time within latest 18 months after signing and annually thereafter (in line with their annual reporting cycle).

How to use this template:

This template does NOT require your bank to produce an additional report. Rather, this template is designed for your bank to provide references/links to where in your existing reporting/public domains the required information can be found. The aim is to keep additional reporting burden to a minimum while ensuring transparency and accountability as set out in Principle 6.

Within this reporting template, there are six areas for self-assessment that are key to showing that your bank is fulfilling its commitments as a signatory of the Principles for Responsible Banking. They are highlighted.

1. Impact Analysis
2. Target Setting
3. Plans for Target Implementation and Monitoring
4. Progress on Implementing Targets
5. Governance Structure for Implementation of the Principles
6. Progress on Implementing the Principles for Responsible Banking

Only for these six highlighted items, it is required that:

- a) An assurer provides limited assurance of your self-assessment. You can do this by including it in your existing assured reporting. Where third-party assurance is not feasible, an independent review may be conducted.
- b) You provide your bank's conclusion/statement if it has fulfilled the respective requirements.

Accommodating different starting points:

Banks have different starting points and operate in different contexts. Your bank may not be able to provide all information required in this template the first time you report. That is fine. Your bank has up to four years from signing to bring its reporting fully in line with the requirements. Feedback, support and peer learning are available to all signatory banks to help them progress with both implementation and reporting.

Annex: Definitions

- a. Impact: An impact is commonly understood as being a change in outcome for a stakeholder. In the context of these Principles this means (aligned with GRI definition) the effect a bank has on people/the society, the economy and the environment and with that on sustainable development. Impacts may be positive or negative, direct or indirect, actual or potential, intended or unintended, short-term or long-term.
- b. Significant Impact: Impact that in terms of scale and/or intensity/salience results in a particularly strong/relevant change in outcome for a stakeholder. In the context of these Principles, the concept of *significant* impact is used to ensure banks focus where their actions/business (can) matter most for people, economy and environment and to provide a reasonable and practical threshold for what issues need to be considered/included, similar to the concept of “materiality”.
